

The next table summarize all the data quality problems, according to the 5 dimensions analyzed, founded on the six tables from bronze layer.

	Completeness	Conformity / Validity	Precision / Accuracy	Consistency	Uniqueness / Duplication
crm_cust_info		Duplicated cst_id , cst_key Whitespaces in cst_firstname , cst_lastname	Outlier date cst_create_date = 1900-01-01	4 rows with empty columns with cst_key different format	
crm_prd_info			Extreme gap of 8 years in prd_start_dts	Likely some prd_nm in the wrong prd_line	
crm_sales_details		Some sls_order_dt values cannot be converted to date Negative values present in sls_sales and sls_price	Only 11 rows have sls_quantity > 1	Null sls_price correlate with sls_quantity	
erp_cust_az12		9 ambiguous values and 4 empty strings in erp_cust_az112	+50-year gap and future, relative to 2026, in few values of bdate		
erp_loc_a101		Ambiguous format cntry : USA / US / United States; DE / Germany. Additionally 5 empty strings			
erp_px_cat_g1v2
